SUMMARY

5th semester Informatics Engineering student at Pamulang University with a GPA of 3.63/4.00, with a strong interest in Artificial Intelligence, Machine Learning, Computer Vision, UI/UX Design, and Front-End Development. Experienced in developing academic and competition-based projects involving Deep Learning, Machine Learning, Blockchain, Computer Vision, and Web Development. Active in student organizations and leadership platforms including Informatics Study Club and Novo Club, while continuously strengthening professional communication skills through English coursework at Englishnesia. Proficient in Python, Java, JavaScript, HTML, CSS, TensorFlow, Keras, scikit-learn, OpenCV, MySQL, and Figma. I combine technical skills, creativity, and communication abilities to develop practical and user-centered technology solutions.

EDUCATION

Pamulang University	South Tangerang, Indonesia
Bachelor of Informatics Engineering	2024 – Present
5th Semester Student Current GPA: 3.63/4.00 - Relevant Coursework: Artificial Intelligence, Data Mining, Database Systems, Algorithms & Programming, Data Structures, and Human-Computer Interaction. - Selected as Best UI/UX Project in a university project/competition. - Participated in academic and technology projects involving Artificial Intelligence, Blockchain, Web Development, and UI/UX Design.	
Vocational High School	South Tangerang, Indonesia
Fashion Design	2020 – 2023
- Developed practical skills in fashion design, creativity, visual presentation, and product development. - Gained experience in creative projects and independent product-making activities.	

WORK EXPERIENCE

Syandana	Indonesia
Live Stream Host	6 Months Experience
- Hosted live streaming sessions to present and promote hijab and fashion products to online audiences. - Explained product details, materials, colors, sizes, and styling options while responding to audience questions in real time. - Analyzed audience interactions and responses to adapt product presentations and maintain viewer engagement. - Developed strong communication, presentation, audience analysis, and problem-solving skills through direct interaction with customers. - Applied visual presentation and audience understanding to create an engaging and user-friendly shopping experience. - Created and managed beauty-related digital content, developing visual concepts and presentations for social media.	
Pamulang University	South Tangerang, Indonesia
Web Administrator Intern – Front-End Developer	2026
- Contributed to the development of a university web-based system, focusing primarily on front-end development and user interface implementation. - Translated UI/UX concepts into responsive and functional web interfaces using HTML, CSS, JavaScript, and Bootstrap. - Designed and refined website layouts based on usability and user experience principles. - Collaborated with the development team to implement front-end features and improve the overall user experience. - Applied responsive web design principles to create consistent and accessible interfaces across different screen sizes.	

ORGANIZATIONS & EXTRACURRICULARS

Informatics Study Club (ISC) - Pamulang University	South Tangerang, Indonesia
Member – UI/UX & Machine Learning Divisions	2024 – Present
- Collaborated with peers to design user interface prototypes, wireframes, and user experience workflows for tech projects. - Participated in Machine Learning study sessions, exploring data preprocessing, model building, and practical application testing.	
Novo Club by Paragon Technology and Innovation	Indonesia
Active Member	2025 – Present
- Engaged in leadership development, youth empowerment, and personal branding programs organized by Paragon. - Participated in collaborative team activities, networking events, and skill-building workshops.	

Englishnesia	Indonesia
English Course Participant (Ongoing Training)	6 Months (Ongoing)
Actively enrolled in a 6-month intensive English language training program at Englishnesia to enhance public speaking, professional writing, and English communication skills.	

LEADERSHIP & PROJECTS

AI Skin Detection & Skincare Recommendation System	Artificial Intelligence & Deep Learning
Developer & UI/UX Designer	2025
- Developed an AI-powered web application using Deep Learning to analyze and identify different skin conditions/types from images. - Built and trained a deep learning model using TensorFlow and Keras for image-based skin analysis. - Integrated the AI model into a web application to provide users with skin analysis results. - Developed a recommendation feature for skincare products based on the detected skin condition. - Designed an intuitive user interface to transform complex AI functionality into an accessible and user-friendly experience.	
PetCoin – WCHL Web3 Challenge	Blockchain & Web3
Developer & UI/UX Designer	2025
- Developed PetCoin, a blockchain-based project as part of the WCHL Web3 Challenge. - Explored blockchain technology and smart contract implementation for a token-based application. - Utilized Internet Computer (ICP), Motoko, and Plug Wallet during the Web3 development process. - Contributed to the project's UI/UX design and translated the concept into a functional digital experience. - Collaborated within a project team to develop and present a Web3-based technology solution.	
Face Recognition Attendance System	Java & Computer Vision
Developer	2025
- Developed a desktop-based attendance system using Java Swing, OpenCV, and MySQL. - Implemented face detection functionality using OpenCV to support student attendance verification. - Designed a database structure to store student information, attendance dates, times, statuses, and captured photos. - Integrated the Java application with MySQL for attendance data management. - Developed an attendance dashboard to monitor and manage student attendance records.	
Student Profiling & Performance Analysis	Data Mining Academic Project
Machine Learning Developer	2026
- Conducted a student profiling and performance analysis project as part of the Data Mining course. - Analyzed a student dataset to identify patterns and characteristics related to student performance. - Applied multiple machine learning algorithms, including Decision Tree (DT), Naive Bayes (NB), Support Vector Machine (SVM), Support Vector Regression (SVR), K-Means, and Hierarchical Clustering. - Performed data preprocessing, transformation, model training, and evaluation as part of the data mining workflow. - Compared classification, regression, and clustering results to understand different patterns within the student dataset. - Used Python and scikit-learn to implement the algorithms and analyze the resulting models.	
Web Photobooth	Front-End Development
Front-End Developer	2025
- Developed an interactive browser-based photobooth application using HTML, CSS, and JavaScript. - Implemented browser camera access and photo capture functionality. - Designed an interactive and responsive interface focused on usability and simple navigation. - Applied JavaScript functionality to create an interactive photo-taking experience.	
UI/UX & Front-End Web Projects	Pamulang University
UI/UX Designer & Front-End Developer	2024 – Present
- Designed user interfaces, wireframes, and prototypes using Figma for academic and personal projects. - Translated UI/UX designs into responsive front-end web interfaces using HTML, CSS, JavaScript, and Bootstrap. - Applied user-centered design principles to improve usability and overall user experience. - Collaborated on technology projects involving web applications, AI, and digital solutions. - Selected as Best UI/UX Project for a completed project.	

SKILLS & INTERESTS

- Technical Skills: Artificial Intelligence, Machine Learning, Deep Learning, Computer Vision, Data Mining, Front-End Development, UI/UX Design, Blockchain & Web3, Database Management.
- Programming: Python, Java, JavaScript, HTML, CSS, SQL, Solidity, Motoko.
- AI & Machine Learning: TensorFlow, Keras, scikit-learn, Pandas, NumPy, Deep Learning, Machine Learning, Data Mining.

- Computer Vision: OpenCV, MediaPipe.
- Web Development: HTML, CSS, JavaScript, Bootstrap, Flask.
- Blockchain & Web3: Solidity, Motoko, Internet Computer (ICP), Plug Wallet, Smart Contracts.
- Database: MySQL.
- UI/UX: Figma, Wireframing, Prototyping, User Interface Design, User Experience Design.
- Tools: Visual Studio Code, Jupyter Notebook, NetBeans.
- Soft Skills: Communication, Presentation, Problem Solving, Teamwork, Collaboration, Creativity, Research & Analysis, Adaptability.
- Interests: Artificial Intelligence, Machine Learning, Deep Learning, Computer Vision, UI/UX Design, Web Development, Blockchain & Web3, and Software Engineering.
